Learning Project WEEK 13

Transport

Age Range: Year 3 and Year 4

Weekly Maths Tasks (aim to do 1 per day)

- Help your child to practise reading scales by measuring the mass and capacity of ingredients in a home baking recipe! Encourage them to use maths to calculate measurement totals or convert between units of measure.
- Write out [these measurements](#) on pieces of paper or card, mix them up and ask your child to convert the units of measure to match them into pairs.
- Using dough or plasticine, give your child 30 seconds to roll it into the longest worm they can. Repeat several times and order the worms from shortest to longest. Estimate the size of each worm in cm and mm e.g. 54 mm, 5.4cm. Measure, then work out the difference between the estimate and the actual measurement.
- Play [Hit the Button](#) - focus on number bonds, halves, doubles and times tables.
- Ask your child to survey the transport which goes past your home. Tally the different vehicles/vehicle colours and then create a bar chart or pictogram. Write statements about the data e.g. Silver was the most popular colour car.

Weekly Reading Tasks (aim to do 1 per day)

- Your child can listen to a free audiobook during their daily walk or in an outdoor space [here](#). Talk to your child about how it made them feel listening to a book in nature.
- Read '[Downhill Racers](#)' using Oxford Owl. Encourage your child to answer the questions at the back of the book in full sentences.
- Encourage your child to find a car advert in a magazine/newspaper and find the meaning of any new vocabulary, especially technical words!
- Ask your child to read the poem [Look at the Train!](#) They can write their own poem about a mode of transport using onomatopoeia (when a word describes a sound and mimics the sound of the object/action) to evoke sounds and rhythm.
- Challenge your child to complete an author study of one of their favourite authors. Can they create a list of their famous books and tick the ones they have read? Can they learn enough about the author to write a biography of their life?

Weekly Spelling Tasks (aim to do 1 per day)

- Your child can create an A-Z list of transport related words. How quickly can they complete this?
- Choose 5 [Common Exception](#) words and write them in a series of dots. Apply them into sentences about travelling.
- Learn about word families [here](#). Your child can show their learning by designing a word family reminder poster.
- Practise spelling these words: **invention, injection, action, hesitation, completion**. Can your child think of other suffixes to add to the root words to alter the meanings e.g. **invent+ing=** inventing, **invent+ed=** invented.
- Ask your child to mind map all of the verbs (action words) they associate with transport and travelling e.g. steers, paddles, control. Which suitable verbs can they include in their writing tasks?

Weekly Writing Tasks (aim to do 1 per day)

- Visit the Literacy Shed for this wonderful resource on [Ruckus](#). Or ask your child to design a [ticket](#) for their chosen mode of transport. This should include space for the destination, date, cost of ticket, expiry date and class.
- Ask your child to write an advert advertising a job to work as a pilot, train driver or bus driver. Include persuasive language to encourage applicants.
- Your child can plan and write a journey story. Where is the main character going and why? What happens on his/her journey? How does the main character overcome this?
- Watch [this video](#) about The Orient Express. Your child can imagine that they have travelled on this beautiful train and write a recount about their journey.
- **Families should only be allowed to use their car 3 times per week.** Can your child write a for/against argument

about this, with adult support? They should consider the impact it would have on the family/environment.

Learning Project – to be completed throughout the week

The project this week aims to provide opportunities for your child to learn more about transport. Learning may focus on modes of transport, transport in the past, the science behind transport, road safety and how to be safe around water.

- **Transport Inventors** - Ask your child to find out about famous transport inventors such as [Henry Ford](#) and [The Wright Brothers](#). Create fact files about these inventors. Can your child draw sketches of different modes of transport **then** and **now**. Can they place different modes of transport on a timeline using their invention date?
- **Colourful Collage** - Ask your child to create their own transport collage. Encourage them to draw, colour or paint a variety of vehicles or make a large collage of one vehicle. Ask them to use bold colours to really make their vehicles stand out! The collage could be made using cut up squares from magazines and leaflets.
- **Obstacle Course** - Ask your child to find any toy transport (cars, trains, etc) they may have at home, then they can design an obstacle course for their vehicle to travel around. This could be on a track or floor involving ramps inside or in the garden. Another idea - get each family member to make a paper aeroplane and throw each one in turn and see whose travels the furthest. Ask your child to measure the lengths of the distance travelled and record these on a bar chart. **Recommendation at least 2 hours of exercise a week.**
- **Let's Talk Transport** -Talk as a family about transport in your life. Talk about how you get to school and work. Do you get your food delivered? Does anyone in the family operate a mode of transport? Is it their job? Discuss the first family car owned. Ask your child to mind map all of the ways your family relies on transport and then to imagine a life without it.
- **Transport Around the World** - Ask your child to look at how people travel around in India. Buses, cycle-rickshaws, autorickshaws, e-rickshaws, tempos (big, brutal-looking autorickshaws), taxis, boats, tongas (horse-drawn carts), metros and urban trains provide transport around India's cities. Encourage them to compare this to Venice and how the people there travel around (gondola and sandolo tours all around the city). Can your child design a new vehicle suitable for each of these places thinking carefully about suitable and local materials?

Additional resources you may wish to engage with:

- [BBC Bitesize](#) - Lots of videos and learning opportunities for all subjects.
- [Times Table Rockstars](#) and [Numbots](#). Your child can access both of these programmes with their school logins. On Times Table Rockstars, children should aim to play Soundcheck for 20 minutes daily.
- IXL online. Click here for [Year 3](#) or here for [Year 4](#). There are interactive games to play and guides for parents.
- Pacesetter Sports and Wellbeing. Our Sports provider, [Pacesetter@Home](#), gives three activities each weekday for the children to participate in. Each activity is approximately 15 minutes long. It's a great way to get the 2 hours of recommended exercise each week in.

We would love to see examples of the children's work.

Please send your photos to the School Office: admin@sgcps.org for us to include in the weekly Keep In Touch Bulletin.
